

Initial spec. for Retendering

Specifications for CNC Machine

- Machine type: CNC disc cutter
- Materials to be cut: Natural fibre, Glass fibre, Carbon fibre and Kevlar fibre reinforced composites and polymers
- Maximum cutting thickness 1-20 mm or higher
- Flexibility to cut the thick and thin both type of samples
- Variable cutting speed: 500 to 3000 Rpm
- Built-in pump for cooling water circulation
- No rough edges after cutting, no secondary finishing required after cutting
- Cutting heads do not have to be changed out, one head for all applications
- Total enclosure safety cabinet for user protection
